### PROFILE

Mechatronics Engineering undergraduate at ESPOL with hands-on experience in mechanical design, programming, electronics, and multidisciplinary engineering projects. Passionate about automation, programming, and electronics. Seeking an internship where I can contribute while continuing to strengthen my technical and professional skills.

### EDUCATION

Escuela Superior Politécnica del Litoral (ESPOL)

Mechatronics Engineering Undergraduate

2023 - Present

Expected Graduation: 2029

### TECHNICAL SKILLS

**Programming:** Java (OOP), Python

**CAD:** Autodesk Inventor, SolidWorks, AutoCAD

**Electronics:** Quartus, Multisim, Arduino IDE

**Development Tools:** Git, GitHub, NetBeans, Replit

**Office:** Microsoft Excel, Word, PowerPoint

### ACADEMIC PROJECTS

- **Restaurant Management System:** Developed a Java console application applying object-oriented programming with modules for customer management, reservations, orders, billing and reporting.
- **Robotic Arm CAD Model:** Modeled and assembled a robotic arm in SolidWorks based on a physical reference.
- **Electromagnetic Braking Prototype:** Designed and built a prototype demonstrating electromagnetic braking and electrical generation using coils.
- **Static Equilibrium Analysis:** Developed a Python program to calculate anchor position and counterweight for a structural equilibrium model.
- **Digital Voting System:** Implemented a digital voting system using Quartus and digital logic design.
- **Magnetic Propulsion Prototype:** Built an experimental prototype exploring magnetic repulsion for vehicle motion.

### CERTIFICATIONS

- EF SET English Certificate – [C1 Advanced](#)

### LANGUAGES

- **Spanish:** Native
- **English:** C1 Advanced

### PORTFOLIO
